

PO No :PO10002531750-302

Customer Name	: Mr.ANKIT KUMAR	Collected Via	: TATA 1MG HYDERABAD
Age/Gender	: 30Y 2M 28D /Male	Referred By	: Dr.
Lab Visit ID	: HYD836002	Collection Date	: 30/May/2026 04:00PM
Barcode ID/Order ID	: D31245711 / 17177075	Report Date	: 30/May/2026 08:46PM
Sample Type	: WHOLE BLOOD-EDTA	Report Status	: Partial Report

HAEMATOLOGY

Test Name	Result	Unit	Bio. Ref. Interval	Method
HbA1c (Glycosylated Hemoglobin)				
Glycosylated Hemoglobin (HbA1c)	4.9	%	4-5.6	HPLC (NGSP certified)
Estimated average glucose (eAG)	93.93	mg/dL		Calculated

Comment:

Interpretation: HbA1c%

≤5.6	Normal
5.7-6.4	At Risk For Diabetes
≥6.5	Diabetes

Adapted from American Diabetes Association.

Comments:

A 3 to 6 monthly monitoring is recommended in diabetics. People with diabetes should get the test done more often if their blood sugar stays too high or if their healthcare provider makes any change in the treatment plan. HbA1c concentration represent the integrated values for blood glucose over the preceding 8-12 weeks and is not affected by daily glucose fluctuation, exercise & recent food intake.

Please note, Glycemic goal should be individualized based on duration of diabetes, age/life expectancy, comorbid conditions, known CVD or advanced microvascular complications, hypoglycemia unawareness, and individual patient considerations.

Factors that interfere with HbA1c Measurement: Hemoglobin variants, elevated fetal hemoglobin (HbF) and chemically modified derivatives of hemoglobin (e.g. carbamylated Hb in patients with renal failure) can affect the accuracy of HbA1c measurements.

Factors that affect interpretation of HbA1c Measurement: Any condition that shortens erythrocyte survival or decrease mean erythrocyte age (e. g., recovery from acute blood loss, hemolytic anemia, HbSS, HbCC, and HbSC) will falsely lower HbA1c test results regardless of the assay method used. Iron deficiency anemia is associated with higher HbA1c.

Note: Presence of Hemoglobin variants and/or conditions that affect red cell turnover must be considered, particularly when the HbA1c result does not correlate with the patient's blood glucose levels.

- HPLC - High performance liquid chromatography

*** End Of Report ***

Pending Test-Vitamin B12

Disclaimer:

1. The reported results based on laboratory investigation, are only for the purposes of diagnosis and should be clinically correlated and interpreted by the referring physician/ medical practitioner. For any queries relating to the reported results, you may write to our customer support team on care@1mg.com

2. It is presumed that the tests performed are, on the specimen / sample being to the patient named or identified and the verifications of particulars have been confirmed by the patient or his / her representative at the point of generation of said specimen.

This test has been performed at

TATA 1MG HYDERABAD

Roxana Padela Estate, 2nd floor,
M.No.8-1-366/1/RPE/201 to 204, Tolichowki,
Hyderabad, Telangana - 500008

3. The reported results are restricted to the given specimen only. Results may vary from lab to lab and from time to time for the same parameter for the same patient (within subject biological variation).
4. The patient's details along with their results in certain cases like notifiable diseases and as per local regulatory requirements will be communicated to the assigned regulatory bodies.
5. The patient samples can be used as part of internal quality control, test verification, data analysis purposes within the testing scope of the laboratory.
6. This report is not valid for medico legal purposes. It is performed to facilitate medical diagnosis only.
7. Pregnant women should seek guidance from a qualified obstetrician as test parameters may vary during pregnancy

 care@1mg.com  **1800-212-2323**

Accurate Testing, Assured Quality: Diagnostics Precision

Stringent quality control

Measures meeting international norms of safety guidelines

Cutting-edge technology

Robust healthcare systems equipped with calibrated & well-maintained machinery

Experienced lab staff

30+ medical professionals with a collective experience of 100+ years

Verified test procedures

Highly standardized test procedures following CLSI* guidelines

External assessments

Thorough third-party assessment by authorized experts

Trained phlebotomists

Ensuring smooth sample collection experience & pre-analytical precision
